SUMMARY

- Master's student in Computer Science with 4 years of professional experience in software development, machine learning, and AI-driven systems. Strong background in Python, LLM workflows, and structured experimentation, with a growing focus on AI applications.

ACADEMIC DETAILS

Examination	University / Institute	Duration
Master of Science, Computer Science (GPA: 2.4)	Universität Paderborn, Paderborn, Germany	Apr 2025 – Current
Bachelor of Technology, Computer Science & Engineering (GPA: 1.6)	Guru Gobind Singh Indraprastha University, GTB Institute of Technology, New Delhi, India	Aug 2017 – Aug 2021

PROFESSIONAL EXPERIENCE

- **Student Research Assistant, Universität Paderborn, Germany** *[May 2026 – Present]*
  - Department of Protestant Theology.
  - Support teaching activities by explaining fundamental AI and LLM concepts to students for seminar.
  - Develop and prepare instructional materials for lectures.
  - Help students in creating an AI chatbot.
  - **Technologies & Tools:** Python, MS Office, AI, LLM, RAG, Topic Modelling

- **Business Technical Solutions Associate Consultant, ZS Associates, India** *[Jan 2024 – Feb 2025]*
  - Led a 4-member team delivering data-driven next-best-action suggestions used by sales representatives targeting Health Care Professionals (HCPs) across multiple accounts.
  - Performed data analysis and transformation on large business datasets to generate actionable insights supporting commercial strategies.
  - Presented insights in regular client reviews, contributing to alignment between analytical outputs and business needs.
  - **Technologies & Tools:** Python, SQL, Big Data, Machine Learning, MS Office

- **Business Technical Solutions Associate, ZS Associates, India** *[Oct 2021 – Dec 2023]*
  - Delivered commercial and medical suggestions to sales representatives and Medical Science Liaisons (MSLs) to support effective engagement with Health Care Professionals (HCPs).
  - Developed sales-focused predictive machine learning models to support decision-making and improve targeting and interaction strategies.
  - Communicated model insights with client teams, enabling data-driven planning and informed interactions with HCPs.
  - **Technologies & Tools:** Python, SQL, Big Data, Machine Learning, MS Office, Java, Maven

- **Business Technical Solutions Associate Intern, ZS Associates, India** *[Mar 2021 – Sep 2021]*
  - Gained hands-on analysis of real-world datasets during my final year of undergraduate studies.
  - Designed and implemented a dynamic targeting system to support sales representatives in creating effective call plans.
  - Developed a resource optimization algorithm to identify high-priority Health Care Professionals (HCPs) per territory for efficient resource allocation.
  - **Technologies & Tools:** Python, SQL, Big Data, Data Analysis, MS Office, Java, Maven

- **Data Mining Intern, Peacock Solar, India** *[Jun 2020 – Aug 2020]*
  - Led analysis of customer solar panel consumption data to generate actionable insights supporting energy usage strategies.

- Performed data cleaning, transformation, and exploratory analysis on large-scale datasets to identify patterns, trends, and opportunities for efficiency improvements.
- Presented insights through dashboards and reports to guide decision-making and optimize resource allocation.
- **Technologies & Tools:** Python, MS Office

TECHNICAL SKILLS

- **Programming and Tools** (Java, Python, Machine Learning, LLM-based Systems, SQL, C, C++, OpenCV, Git, AWS), **Data & Engineering** (ETL, Big Data, MongoDB).

PROJECTS

- **Fast RGCN on MUTAG RDF Dataset with GNN Explainer**
  - Training and interpreting a Relational Graph Convolutional Network on the MUTAG RDF dataset using Fast RGCN and GNN Explainer.
  - **Technologies & Tools:** Python, Machine Learning, Explainable AI
- **RAG Pipeline**
  - Built RAG pipeline with hybrid BM25 + vector retrieval and cross-encoder reranking, improving answer accuracy by 32% over naive vector search.
  - Implemented RAGAS evaluation suite and LLM-based hallucination detection pipeline, reducing ungrounded outputs by 25%.
  - **Technologies & Tools:** Langchain, FastApi, Streamlit, FAISS, ChatGroq, HuggingFace

VOLUNTEERING

- **MEMBER, OGV TEAM, AIESEC PADERBORN** *[Sep 2025 – Feb 2026]*
  - Supported participants in identifying suitable international volunteer opportunities.
  - Coordinated with host organizations to facilitate placements and logistics.
  - Guided applicants through the full process, including application, preparation, and post-experience support.

LANGUAGES
